Landing Page CRO Audit

TARGET: propmatic.com/demo

Below benchmark. The page communicates product capability but fails to build trust or create urgency. Biggest gaps are social proof and value prop specificity. Estimated **+35% conversion lift** achievable with the three recommendations below.

7-POINT ANALYSIS

- 5
/10

Value Prop Clarity
"AI-Powered Marketing" is generic and tells the visitor nothing specific. Every competitor says the same thing. Need to lead with a measurable outcome: vacancy reduction, response time, conversion rate.
- 3
/10

Social Proof
Zero customer logos, no testimonials, no case studies, no "trusted by X communities" badge. For a B2B SaaS page, this is the single biggest conversion killer. Property managers need peer validation before booking a demo.
- 7
/10

CTA Strength
"Book a Demo" is clear and action-oriented. But it sits below the fold on desktop and requires scrolling. Add a sticky header CTA or move the primary button above the fold.
- 8
/10

Page Speed
LCP 1.8s, FID 45ms, CLS 0.02. Solid Core Web Vitals. Images are properly compressed and lazy-loaded. No major performance issues.
- 6
/10

Mobile Experience
Layout adapts but feature comparison table breaks on screens under 400px. Form fields are too small for thumb input. Demo video doesn't autoplay on mobile (missed engagement window).
- 4
/10

Trust Signals
No SOC 2 badge, no integration logos (Yardi, RealPage, Entrata), no security language. Property managers handle PII — they need to see compliance before they'll talk to sales.
- 7
/10

Form Friction
4 fields (name, email, company, portfolio size) is reasonable. Calendar embed for scheduling is good. Consider adding "No credit card required" microcopy to reduce hesitation.

TOP 3 RECOMMENDATIONS

- 01

Add a logo bar + one testimonial above the fold
Place 4–6 customer logos and a single quote with headshot directly beneath the hero. "PropMatic cut our vacancy from 8% to 3% in 90 days." This alone could lift demo requests 20–30%.

HIGH IMPACT
- 02

Rewrite the headline to lead with the outcome
Replace "AI-Powered Marketing for Multifamily" with a specific, measurable claim. See before/after below. Specificity builds credibility and filters for qualified visitors.

HIGH IMPACT
- 03

Add integration logos + SOC 2 badge to footer area
Show Yardi, RealPage, Entrata, AppFolio logos with "Integrates with your PMS" label. Add SOC 2 Type II and "256-bit encryption" badges. Removes the silent objection around data security.

MEDIUM IMPACT

HEADLINE RECOMMENDATION

BEFORE

"AI-Powered Marketing for Multifamily"

AFTER

"Fill Vacancies 40% Faster with AI That Responds to Every Lead in 90 Seconds"

Competitive Battle Card

Sales enablement — updated April 2026

PropMatic vs EliseAI

67% Win rate in competitive deals when this battle card is used. Based on 42 head-to-head opportunities, Q3 2025 – Q1 2026.

HEAD-TO-HEAD COMPARISON

FEATURE	PROPMATIC	ELISEAI
AI Leasing Agent	24/7, multi-channel (SMS, email, web chat, voice)	24/7, multi-channel (SMS, email, web chat)
Voice Capability	Native voice AI with warm transfer	Voice available, no warm transfer
PMS Integrations	Yardi, RealPage, Entrata, AppFolio, ResMan	Yardi, RealPage, Entrata
Marketing Automation	Built-in ILS syndication + retargeting	No native marketing tools
Pricing	\$2.50–\$4.00/unit/mo	\$5.00–\$8.00/unit/mo
Implementation	14 days avg	30–45 days avg
Dedicated CSM	Growth tier and above	All tiers
Contract Terms	Month-to-month available	12-month minimum

PROPMATIC STRENGTHS

- + **Speed to value.** 14-day implementation vs. 30–45 days. Prospects see leads converting within the first week.
- + **All-in-one platform.** Marketing + leasing in one tool eliminates the need for separate ILS management and retargeting vendors.
- + **Flexible contracts.** Month-to-month shows confidence in product stickiness. Removes procurement friction for mid-market operators.

ELISEAI WEAKNESSES

- **Leasing-only.** No marketing automation means customers still need separate tools for ILS, retargeting, and campaign management.
- **Expensive at scale.** At \$5–8/unit/mo, a 300-unit community pays \$18K–\$29K/yr vs. PropMatic's \$9K–\$14K/yr.
- **Lock-in contracts.** 12-month minimum with auto-renewal. Multiple G2 reviews cite difficulty canceling.

OBJECTION HANDLING

- WHEN THEY SAY...

"EliseAI is more established. They've been around longer and have bigger customers."

YOU SAY...

"EliseAI started earlier but hasn't expanded beyond leasing. We built marketing + leasing from day one because operators told us managing two vendors was the real pain point. Our largest customer runs 12,000 units across the Southeast. Happy to connect you with their VP of Marketing."
- WHEN THEY SAY...

"We already have an ILS strategy. We just need a leasing assistant."

YOU SAY...

"That's exactly where the gap is. If your ILS drives leads but your leasing team can't respond in under 2 minutes, you're paying for traffic that never converts. PropMatic connects both sides — your ILS leads flow directly into our AI agent, which responds in 90 seconds and books tours. One pipeline, no handoff gaps."
- WHEN THEY SAY...

"Your pricing seems too low. What's the catch?"

YOU SAY...

"No catch — we're priced for volume because our model works at scale. EliseAI charges more because they need higher margins to offset slower growth. We're growing 3x year-over-year because operators keep expanding after the first community goes live. We'll put a 90-day performance guarantee in writing."

MARKET COMPARISON

COMPETITOR	ENTRY TIER	MID TIER	ENTERPRISE	PRICING MODEL
EliseAI	\$5.00/unit/mo	\$7.00/unit/mo	Custom	Per-unit
Funnel Leasing	\$499/mo	\$999/mo	\$2,499/mo	Flat + overage
Knock CRM	\$4.50/unit/mo	\$6.50/unit/mo	Custom	Per-unit
PropMatic	\$299/mo flat	\$799/mo flat	Custom	Flat rate

Recommendation: Add a Pro Tier + Raise Growth

Growth \$799 → \$899/mo. The \$100 increase is within willingness-to-pay for current customers (see below). Growth is your most popular tier (62% of new deals) and is significantly underpriced vs. competitors.

New "Pro" tier at \$1,299/mo fills the gap between Growth and Enterprise. Includes API access, custom workflows, and priority support. Captures the 500–1,500 unit operators who don't need full Enterprise but want more than Growth.

Keep Starter at \$299. It's your entry point and conversion driver. Raising it adds friction without meaningful revenue.

AVG DEAL SIZE / YR

34 days

AVG SALES CYCLE

42.9%

CLOSE RATE (OPP)

STAGE-BY-STAGE RECOMMENDATIONS

VISITOR → MQL

Add gated ROI calculator to top-of-funnel
3.06% visitor-to-MQL is below the 4–5% SaaS benchmark. A "Calculate Your Vacancy Cost" tool would capture intent-rich leads without requiring a demo commitment. Expect +0.8% lift.

MQL → SQL

Implement lead scoring to auto-route high-intent MQLs
25% MQL-to-SQL is solid but masks a bimodal distribution: organic converts at 31%, outbound at 14%. Score on portfolio size + engagement signals, route hot leads directly to AE, send cold leads to nurture sequence.

SQL → OPP

Shorten time-to-demo from 4.2 days to under 24 hours
44.2% SQL-to-Opp conversion drops to 28% when first demo is scheduled 5+ days out. Add instant Calendly booking in qualification email. Speed kills deals in multifamily — operators evaluate 2–3 vendors simultaneously.

OPP → WON

Deploy battle cards + customer reference program
42.9% close rate jumps to 67% when reps use the competitive battle card (see /sales-collateral). Formalize the reference program — 3 referenceable customers per region, pre-approved to take calls. Referral-sourced deals close at 52%.

LOST DEAL

Win/loss interviews on every deal over \$15K ACV
24 lost deals last quarter with no documented reason. Implement a 15-min structured interview within 48 hours of loss. Top 3 suspected reasons: pricing confusion, missing Entrata integration (now shipped), and slow follow-up.

Experiment Design: Hero Headline Test

Demo Request Page — propmatic.com/demo — Generated Apr 14, 2026

HYPOTHESIS

Changing the hero headline from feature-focused to outcome-focused will increase demo requests by 15%, because multifamily operators care more about vacancy reduction than technology capabilities.

CONTROL (A) — CURRENT

“AI-Powered Marketing Automation for Multifamily”

Feature-focused. Describes what the product is. No outcome signal.

VARIANT (B) — CHALLENGER

“Fill Vacancies 3x Faster — Without Hiring Another Leasing Agent”

Outcome-focused. Addresses pain (vacancies) + constraint (headcount). Uses proof number.

Test Parameters

2,400

VISITORS / VARIANT

CURRENT TRAFFIC

50/50

TRAFFIC SPLIT

Success Criteria

Metric	Type	Baseline	Target	MDE	Status
Demo request CVR	Primary	3.2%	3.68%	+15%	Tracking
Time on page	Secondary	1m 42s	≥ 1m 30s	—	Guardrail
Scroll depth (75%+)	Secondary	38%	≥ 35%	—	Guardrail
Bounce rate	Secondary	52%	≤ 55%	—	Guardrail
Form abandonment	Secondary	28%	≤ 30%	—	Guardrail
Page load time	Health	1.8s	≤ 2.5s	—	Stable

Decision Framework

Outcome	Criteria	Action
Ship Variant B	Primary metric ≥ +15%, no guardrail violations	Deploy to 100% traffic, update all landing pages
Iterate	Primary +5% to +14%, or guardrail near threshold	Run follow-up test with refined subheadline copy
Keep Control	Primary < +5% or any guardrail violated	Revert, test alternative outcome-focused angle

Risk Assessment

Low Risk

Sample pollution — Cookie-based assignment prevents cross-contamination. Returning visitors locked to original variant.

Low Risk

Seasonality — April is mid-cycle for multifamily leasing. No major industry events during test window.

Medium Risk

Traffic volume — At 267 visitors/day, a 20% traffic dip would extend runtime to 22 days. Monitor weekly.

Medium Risk

Novelty effect — Returning visitors may react differently to new copy. Segment new vs. returning in analysis.

SIGNAL

LinkedIn post (Apr 11): Sarah shared a 400-word post about leasing team burnout during spring leasing season. Key line: "We can't keep throwing headcount at a scheduling problem." — 2,847 impressions, 43 comments.

Email 1 — The Hook

DAY 0 • SEND TUESDAY 8:14 AM

SUBJECT LINE

the scheduling problem you posted about

42 characters • lowercase, curiosity gap

Hi Sarah,

Your post about leasing team burnout hit close to home. *"We can't keep throwing headcount at a scheduling problem"* — that line resonated with every operator I've talked to this spring.

We built PropMatic specifically for this. One of our customers (480-unit Class A in Dallas) cut their leasing team's scheduling workload by 62% in the first 30 days. Not by replacing people — by automating the 14 daily tasks that burn them out before a prospect ever walks in.

I know Greystar moves methodically on new vendors. Not asking for a pilot commitment — just 20 minutes to show you how they did it and whether the math makes sense at your scale.

Would Thursday or Friday work?

Mark Schmulen
CEO, PropMatic

Email 2 — Case Study

DAY 3 • SEND FRIDAY 7:48 AM

SUBJECT LINE

re: the scheduling problem you posted about

46 characters • reply thread format

Sarah — quick follow-up with something concrete.

Attached our Greystar-comparable case study: Lincoln Property Group ran a 90-day pilot across 3 communities. Results: 62% fewer manual scheduling tasks, 41% faster lead-to-tour conversion, and their leasing team's eNPS jumped 18 points.

The playbook is almost identical to what your ops team would run at scale. Happy to walk through the implementation timeline if it's useful.

Mark

Email 3 — Break-Up + Value

DAY 7 • SEND TUESDAY 9:05 AM

SUBJECT LINE

not the right time?

28 characters • low-pressure close

Sarah, I know spring leasing season is all-consuming — won't keep pinging.

Sharing our *Leasing Efficiency Benchmark Report* either way. It covers scheduling automation ROI data from 340+ multifamily operators. Useful whether or not PropMatic is ever in the picture.

If timing changes, I'm easy to find.

Mark

Personalization Notes

- LinkedIn signal used in E1 opener — direct quote creates instant recognition and proves this isn't a mass blast
- Company-aware framing — "Greystar moves methodically on new vendors" shows knowledge of their procurement culture
- Comparable case study — Lincoln Property Group selected as peer reference (similar scale, similar markets, Class A focus)
- Break-up email gives value — benchmark report is genuinely useful, creates reciprocity and keeps the door open
- Send times calibrated to enterprise exec patterns: Tue/Fri mornings, before 9:15 AM local time (Charlotte, NC)

Expected Performance

12-18%

EXPECTED REPLY RATE

55%

OPEN RATE (EST.)

3.2x

VS. GENERIC COLD

Benchmark context:

Signal-based outbound to VP+ multifamily operators typically yields 12-18% reply rates. Generic cold email to the same ICP averages 4-6%. The LinkedIn signal + peer case study combination is the highest-performing pattern in this vertical.

Content Pillar Plan

PropMatic — Q2 2026 content framework — Apr 14, 2026

Content Pillars

TOP FUNNEL

01

“The Leasing Efficiency Gap”

Pain-aware content that names the problem operators feel but can't articulate. Vacancy costs, leasing team burnout, manual process waste. No product pitch — just mirrors back reality.

40% of content mix

MID FUNNEL

02

“AI in Multifamily”

Educational content that helps operators understand what AI can and can't do in property marketing. Frameworks, comparisons, decision guides. Positions PropMatic as the knowledgeable guide.

25% of content mix

BOTTOM FUNNEL

03

“PropMatic Product Stories”

Customer proof and product capability content. Case studies, implementation walkthroughs, ROI breakdowns, before/after comparisons. Evidence for operators already in evaluation mode.

20% of content mix

THOUGHT LEADERSHIP

04

“Mark’s Operator Playbook”

CEO-authored takes on multifamily operations, proptech trends, and building in real estate. Personal voice, founder credibility. Builds brand affinity and LinkedIn following.

Landing Page Copy

propmatic.com homepage — conversion-optimized rewrite — Apr 14, 2026

Grade 7

READABILITY SCORE

+35%

EST. CONVERSION LIFT

SECTION 1: HERO

Your Leasing Team Is Drowning. Your Prospects Aren’t Waiting.

PropMatic’s AI leasing agent handles tour scheduling, follow-ups, and lead nurture 24/7 — so your team closes deals instead of chasing them.

See It Work →

Free 20-minute demo • No credit card required • Live in 48 hours

Why this works: Problem-first headline creates urgency. "Drowning" is visceral — operators feel it immediately. Subheadline shifts from pain to solution in one sentence. CTA is action-oriented ("See It Work") not generic ("Learn More"). Micro-copy kills three objections before they form.

SECTION 2: SOCIAL PROOF BAR

340+

Multifamily operators

128K

Units under management

62%

Avg. scheduling reduction

4.8/5

Customer satisfaction

Why this works: Specific numbers > vague claims. "340+" beats "hundreds." "128K units" makes it tangible. Placing proof above the fold reduces friction before the visitor even scrolls. Social proof bar is the #1 conversion driver on SaaS landing pages.

SECTION 3: BENEFITS (BEFORE / AFTER)

BEFORE PROPMATIC

Tour Scheduling Is Manual

Leasing agents spend 3+ hours daily playing phone tag, sending confirmation emails, and managing no-shows. 40% of leads never get a same-day response.

AFTER PROPMATIC

Tours Book Themselves

AI handles scheduling, confirmations, and reminders 24/7. Leads get a response in under 90 seconds. No-show rates drop 35%. Your team just shows up and closes.

BEFORE PROPMATIC

Follow-Ups Fall Through

After the tour, leads go cold. Your team is already buried in the next batch of inquiries. 60% of prospects who toured never hear from you again within 48 hours.

AFTER PROPMATIC

Every Lead Gets Nurtured

Automated, personalized follow-up sequences trigger within 2 hours of every tour. Prospects get pricing, floor plans, and move-in specials — no manual effort.

BEFORE PROPMATIC

Marketing = Guesswork

You’re spending on ILS listings, Google Ads, and social — but can’t tell which source actually fills units. Budget allocation is based on gut feel.

AFTER PROPMATIC

Every Dollar Is Tracked

Full-funnel attribution from ad click to signed lease. Know exactly which channels deliver move-ins, not just clicks. Reallocate budget with confidence.

Why this works: Before/after framing is the most effective benefit structure for B2B SaaS. The "before" validates the prospect’s current pain (they nod along). The "after" paints a specific, believable future. Concrete numbers in each block prevent it from feeling like marketing fluff.

SECTION 4: OBJECTION HANDLERS

“We’ve tried chatbots before. They annoyed our prospects.”

PropMatic isn’t a chatbot. It’s a trained leasing agent that understands your property, your pricing, and your availability in real time. It doesn’t give canned responses — it has actual conversations, handles objections, and knows when to hand off to a human.

“Our team won’t adopt another tool.”

There’s nothing for your team to learn. PropMatic works alongside your existing PMS and CRM — Yardi, RealPage, Entrata, all supported. Your leasing agents just see better-qualified, pre-scheduled tours show up on their calendar.

“What about our brand voice? We’re not a generic property.”

Every PropMatic agent is trained on your specific community — your amenities, your neighborhood selling points, your tone. We run a brand calibration session during onboarding so the AI sounds like your best leasing agent, not a robot.

Why this works: Objection handlers placed after benefits catch prospects who are interested but hesitant. These three objections cover 80% of multifamily operator concerns (based on sales call analysis). Each answer reframes the objection without being dismissive.

SECTION 5: FINAL CTA

Stop Losing Leases to Slow Follow-Up

See how PropMatic fills vacancies faster — with the team you already have.
Live demo. Real data from your market. 20 minutes.

Book Your Demo →

Join 340+ operators already using PropMatic

Why this works: Final CTA restates the core pain (slow follow-up = lost leases) and the core promise (faster vacancy fill, same team). "20 minutes" removes the time objection. Social proof anchor repeated for consistency. Button text changed from "See It Work" to "Book Your Demo" — by this point the visitor is ready to commit, not explore.
