Companion

Innovation Workshop PDF (39 ideas, three tracks)

SECTION A · ENGAGEMENT OVERVIEW

1915 South | Ashley

29 Ashley HomeStores across the Southeast (FL · GA · NC · AL · MS · VA), four distribution centers, and a vertically integrated last-mile operation. A roll-up posture already proven by two acquisitions in three years and a stated path toward ~48 stores inside 18 months.

At a glance

FOOTPRINT

29 stores: FL (12), GA (7), NC (4), AL (5), MS (1), VA (1). Four DCs across four states. Vertically integrated last-mile delivery.

M&A CADENCE

Two acquisitions in three years — Howard Fineman (Jacksonville, 2022) and Yulee FL (2025). The roll-up thesis is not hypothetical.

ASHLEY CORPORATE CONTEXT

Manufacturer CEO Todd Wanek has publicly committed \$2B to AI and innovation, set the GMROI Excellence Framework directive (Dec 2024), and ceased mainland China sourcing (April 2025). 170+ AI projects identified inside Ashley corporate.

ENGAGEMENT FOCUS

Three workstreams running in parallel: Innovation Workshop (39 scored ideas), M&A and Capital roadmap, and Role Design + Applied AI.

What's on the table — three workstreams

Workstream 1 · Innovation Workshop

39 scored ideas across three tracks — Format / Product, Ops / AI Arbitrage, and Back-Office / CFO Transition. Designed as both a portfolio of options and a working baseline for sequencing inside the next 6–24 months. Visual preview at the back of this document; the full pitch lives in the companion **Innovation Workshop PDF**.

Workstream 2 · M&A and Capital

A 10-section deep brief on the roll-up thesis, valuation anchors, target operator pool screened from public sources, capital partner universe, and a recommended strategic sequence. Section B of this document carries the client-safe synthesis.

Workstream 3 · Role Design and Applied AI

Role architecture for the seat Justin sketched in his April 20 email — financial controllership plus M&A operating partnership plus the AI decision layer above the existing data foundation. Section C lays out the scope of accountability, the three operating layers, and a year-1 outline.

Engagement context

- **Inbound conversation.** Justin Woods opened the conversation in April 2026, framing the opportunity around organizational redesign tied to AI-enabled ways of working — including a CFO-shaped seat with technology and applied AI in scope.
- **Manufacturer-level AI mandate.** Ashley Furniture Industries (Todd Wanek, CEO) has publicly stated businesses have "3–5 years to figure out AI or get left behind," committed \$2B to innovation, and operationalized a GMROI Excellence Framework for licensees (Dec 2024). 170+ AI projects in flight inside Ashley corporate.
- **Roll-up posture.** Two acquisitions in three years and a stated path to ~48 stores within 18 months. Southeast distress (Franchise Group / Conn's / Badcock / American Freight) cleared substantial regional retail capacity 2024–2025 — a real-estate window that's open now and won't last.
- **Family ownership and continuity.** Russell Turner, 4th-generation family owner, brought Justin in as President to lead the operating company forward. Continuity, culture, and 1915 South's track record are first-order constraints — the engagement is built around protecting them, not stress-testing them.

HOW TO READ THIS DOCUMENT

Section B (M&A and Capital) is the centerpiece — it carries the most depth and is the section most directly tied to the questions Justin has been asking. Section C is the role architecture. Section D is a visual preview pointing to the Innovation Workshop companion PDF.

M&A and Capital Strategy

Roll-up thesis, valuation anchors, named target operator pool (public sources only), capital partner universe, strategic-partnership map, adjacencies, and a recommended sequence across the next 6 / 12 / 24 months.

Buy-side roll-up

FRG real-estate dividend

Capital-in optionality

Strategic partnerships

Adjacencies

Strategic sequence

B.1 The thesis in one paragraph

1915 South is already a roll-up, not a single-site retailer. Two closed deals in three years and a named VP of Corporate Development & Strategy mean the M&A muscle is in place. The Southeast is currently the single most target-rich region in the country for furniture M&A — Franchise Group's 2024 collapse emptied roughly 900 storefronts across 1915 South's core states; several multi-generation independents are at succession age; multiple Ashley licensees in adjacent territory are sub-scale; and Havertys, the public competitor, is executing a pure real-estate-scavenging expansion and leaving the customer-acquisition play on the table. 1915 South can credibly run two to three deals per year starting now, with a path to ~48 stores inside 18 months and a real-estate dividend that compounds the operating story.

B.2 Anchors

ROLL-UP CADENCE

Two acquisitions in three years (Fineman Jacksonville 2022, Yulee FL 2025). Stated path to ~48 stores in 18 months. The team has built the muscle.

REGIONAL DISLOCATION

~880 Southeast storefronts vacated 2024–2025 from Franchise Group / Badcock / Conn's / American Freight. Once-a-decade real-estate window inside the 1915 South footprint.

MANUFACTURER POSTURE

Ashley CEO Todd Wanek: \$2B innovation commitment, GMROI Excellence Framework Dec 2024, mainland China sourcing ceased April 2025. Resident Home acquired for ~\$1B March 2024.

PE RE-ENTRY

PE home-goods activity +45.5% YoY in 2025 (16 deals YTD; 12 platform deals vs. 2 the prior year). Lincoln International expects H2 2025 to be when momentum breaks loose.

B.3 Valuation anchors (back-of-envelope)

Frames pulled from public-market comps and the standard mid-market frameworks. These are reference ranges, not external quotes — any number used outside this engagement should be re-underwritten against 1915 South's actual financials.

FRAME	LOW	MID	HIGH	NOTES
Public mid-market EV / EBITDA (HVT, ETD, LZB, BSET range 4–7×)	\$102M	\$140M	\$180M	The readily-available benchmark.
Kerrigan / Haig blue-sky (3.5–5.5× adjusted pre-tax, post-addbacks)	\$90M	\$115M	\$150M	Operating value only. Real estate priced separately at 6–8% cap on owned locations.
Strategic buyer premium (+1–2×)	\$155M	\$180M	\$225M	A larger Ashley licensee or AFI itself would pay a premium for geographic density.

Most credible current operating-EV range: **\$140–180M operating + separately-priced real estate**; pushed to **\$200M+** with a strategic acquirer in scope.

B.4 Why now

- **Manufacturer cover.** Ashley corporate's AI mandate creates top-down support for showcase licensees who move on operating-model modernization in tandem with footprint expansion.
- **Once-a-decade real-estate window.** Box-for-box availability in the 1915 South footprint is the highest it has been in five-plus years and is unlikely to persist at this scale into 2027.
- **Operator-pricing reset.** Distressed transaction comps have re-anchored what franchisee tuck-ins should clear at — often well below the prior multiple regime.
- **M&A velocity already exists.** Justin's named VP Corp Dev creates a permanent owner of the pipeline; codifying the playbook now (while Fineman and Yulee are fresh) costs a fraction of what it will cost in 12 months.

B.5 Buy-side — target archetypes

ARCHETYPE	PROFILE	REFERENCE	FINANCING	INTEGRATION TIMELINE
Fineman-class tuck-in	3–5 stores, same-state or adjacent, succession-stressed owner, overlapping vendor relationships	1915 South's May 2022 Jax + Brunswick deal	Cash + seller note common	~90 days to banner flip; 12 months to full margin capture
FRG-footprint real-estate play	Acquire former Conn's / Badcock / American Freight locations for re-banner; not a going concern, just a box plus local pricing data	Havertys playbook (Joann / Big Lots / B3 spaces)	Lease take-over, minimal equity	~6 months to open
Adjacent-state Ashley licensee	Small Ashley licensee in SC, TN, KY, or LA with 3–10 stores and a succession-age owner	Multiple candidates publicly identifiable	Cash + earnout + seller rollover	~6–9 months
Distressed non-Ashley regional retailer + re-banner	Mid-market independent facing rate / inventory stress; acquire and banner-flip to Ashley	Mitchell Gold, Z Gallerie, Interior Define precedents	Section 363 process or asset purchase from Ch. 11	~12–18 months

B.6 Named target operator pool

15 named candidates screened from public sources only — geography, format, ownership posture, and adjacency to the 1915 South footprint. Highest-priority

candidates summarized below; the full roster sits in the supporting research files.

- **Southwest Virginia Ashley licensee.** 8–9 stores Roanoke through Bluefield; dual-brand operator with an independent Mechanicsville chain (Home-Makers Furniture, since 1988). Reverse-carve-out precedent. Directly adjacent to the Danville VA footprint.
- **Grand Furniture / GrandBrands** (Stein family, 4th gen, Norfolk VA). Operates own Grand brand plus Ashley HomeStores in Chesapeake / VA Beach / Newport News. Direct overlap with 1915 South's VA footprint.
- **Kane's Furniture** (Pinellas Park FL, ~18 stores, founded 1948). Post-founding-family leadership; FL-only geographic overlap with 1915 South's 12 FL stores.
- **Baer's Furniture** (Baer family, 4th gen, ~16 FL stores). Mid-price / high-end segment — would extend 1915 South's price-point coverage.
- **Miskelly Furniture** (Jackson MS, founding family since 1978). Direct MS-footprint overlap; Koalafi early adopter.
- **FRG-footprint real-estate targets.** Specific Conn's / Badcock boxes in FL, GA, AL, NC with good trade areas still available at distressed lease terms.

B.7 The FRG / Badcock real-estate dividend

Between July 2024 and March 2025, Franchise Group and its consumer-retail subsidiaries collapsed: Conn's HomePlus (which had acquired Badcock in 2023) filed Chapter 11 in July 2024; Franchise Group parent followed in November 2024 with American Freight (357 stores) closing immediately. Net effect: roughly 900 retail storefronts vacated across the FRG footprint, with the customer base concentrated in low-prime credit tiers — the same customer segment Ashley HomeStores serve.

REAL ESTATE

Badcock's Mulberry FL footprint, Conn's TX/LA/FL/AL/GA footprint, and American Freight's national footprint sit on landlord re-lease lists at distressed terms. Havertys is already executing this play.

CUSTOMER BASE

FRG served roughly the same furniture customer as Ashley HomeStore. Those customers are now shopping somewhere; capture cost at re-banner is signage and local advertising rather than full LTV-led acquisition.

TALENT

Experienced furniture-retail store managers, delivery drivers, and sales associates are available in 1915 South's core markets — an unusual window to upgrade bench depth without paying market premium.

The play. Treat the FRG-footprint dividend as a distinct sub-thesis inside the buy-side roll-up. Build a box-by-box opportunity map within a 45-mile radius of every existing 1915 South store. Score boxes on trade-area demographics, lease terms, and proximity to existing DC infrastructure. Target 3–5 new boxes in 2026, 5–8 in 2027. Capital requirements are modest — these are mostly lease take-overs; fit-out capex per box runs \$500K–\$1.5M with 24–36 month payback at historical store unit economics.

B.8 Financing structures

STRUCTURE	WHAT IT IS	BEST FIT
Cash from operations + seller note	Self-finance tuck-ins out of free cash flow; seller note bridges valuation gaps	Fineman-class deals; succession-motivated owners willing to carry paper
ABL line + unitranche	Dedicated acquisition facility through a relationship bank (likely Truist, BBVA-PNC, or Synovus given Southeast geography)	Larger deals; 4–6× senior leverage standard
Seller-rollover equity	10–20% seller rollover into NewCo at close; preserves operating knowledge and aligns incentives	Succession deals where founder wants continuity (Fineman archetype)
Real-estate carve-out + sale-leaseback	Separate OpCo from PropCo; sale-leaseback owned real estate at 6–8% cap	Capital-in lever that doesn't require operating-equity dilution

B.9 Strategic partnerships — universe map

The partnership lanes 1915 South can deepen or restructure, ordered roughly by strategic leverage. Each is a no-regret move that does not depend on a capital event.

Ashley corporate

The relationship is not a partnership in the contractual sense — it's the parent-company dynamic — but every licensee has a defined elevation path. Top-tier status brings preferred territory assignments, innovation-pilot access, and margin-friendly terms. **The play:** position 1915 South as Ashley's AI + GMROI showcase licensee.

Propose a quarterly Wanek-level review meeting; bring specific metrics from the new operating layer to every one. This is positioning, not a pitch for capital.

Final-mile delivery

The Bassett / Zenith Freight Lines template (JB Hunt acquired Bassett's in-house delivery in 2017 with a long-term master services agreement) is the playbook reference. Possible structures: (a) contract a 3PL for all final-mile, (b) divest in-house delivery assets to a 3PL under a long-term MSA, or (c) maintain a dual-provider model for resilience. Data-driven SLAs on damage rate, first-time delivery success, and NPS as explicit contract terms.

Sleep / mattress vertical

Tempur Sealy / Mattress Firm closed February 5, 2025. Tempur Sealy committed to reserve 25% of MFRM floor space for third-party brands for five years (75% of that for >\$1,500 mattresses) as a regulatory concession — a signal of strategic willingness to partner at scale with adjacent retailers. **The play:** a direct Tempur Sealy + 1915 South conversation about co-branded sleep destinations within Ashley stores, with preferred pricing and marketing support.

Consumer financing

The Koalafi / Synchrony waterfall (announced January 2026) is a single-application offer covering Synchrony store card + Koalafi lease-to-own — already live at The Wellsville Group (top-10 Ashley licensee) and Miskelly Furniture. **The play:** immediate adoption, with revenue-share mechanics integrated into the Ashley data platform so approval rates and lifetime value roll up into store-level P&L.

Data platform scope

Existing data foundation (Zapsight) is shipping the pipes layer well; agentic capabilities are being built on top. The opportunity is a clean RACI plus a refreshed SOW: explicit definition of what the data vendor delivers (pipes, ingestion, agents) versus what 1915 South owns (decision layer, strategy, vendor management). Data-ownership terms should give 1915 South full optionality.

B.10 Adjacencies and vertical integration

Ashley Care Plus — service as product

Innovation Workshop concept A5. 40K annual deliveries × 30% attach × \$120 AOV ≈ **\$1.4M high-margin revenue**. Furniture-industry attach rates run 30–50% at high-performing retailers during product presentation versus <10% at checkout — the

lever is training and presentation, not the plan itself. Vendor options span Montage Furniture Services, Allstate Protection Plans / SquareTrade, Guardian Protection Products, OnPoint Warranty. Pattern reference: Best Buy Geek Squad runs 40–50% gross margin on \$2B+ annual revenue, ~4% of total Best Buy revenue.

B2B / hospitality / contract channel

Ashley Contract, RH Contract, West Elm Contract, and Bernhardt Contract exist as dedicated B2B arms for competitors. A Southeast-focused contract arm could serve multi-family (Camden, Greystar), senior living (Watermark, Sunrise), student housing (American Campus, Scion), short-term rental (Vacasa, Sonder regional operators), and hospitality (Kimpton, InterContinental). Margin is thinner per unit, but volume is higher and more predictable, and it leverages existing DC and sales infrastructure.

Trade-in / circular pilot

AptDeco, Kaiyo, Chairish, FloorFound, and Revivn are developing retailer-partnership models. IKEA has run trade-in. A pilot offering trade-in credit toward new purchase within 90 days of delivery — with used product flowing through a dedicated outlet channel — is margin-neutral but drives repeat-purchase velocity.

B.11 Strategic sequence — what to run next

Six months (May–Oct 2026)

1. **Codify the M&A playbook.** Innovation Workshop C7 expanded — diligence checklist, 90-day integration runbook, post-mortems from Fineman and Yulee. ~60 days. Owned jointly with VP Corp Dev.
2. **Land the partnership redesigns.** Koalafi + Synchrony adoption, data-vendor RACI + revised SOW, Tempur Sealy 3rd-party conversation, structured final-mile assessment. All no-regret moves.
3. **Build the FRG-footprint opportunity map.** 45-mile radius of every 1915 South store × all former Conn's / Badcock / American Freight + Mitchell Gold + Z Gallerie + similar 2023–2025 closures.
4. **Surface the AI showcase narrative to Ashley corporate.** One-page proposed showcase outline; doesn't need AFI sign-off, but framing the intent builds the elevation narrative early.

Twelve months (by April 2027)

5. **Close two deals.** One Fineman-class tuck-in (Southwest VA Ashley licensee or similar) plus one FRG-footprint real-estate play (3–5 boxes re-opened).
6. **Pilot Ashley Care Plus** at 5 stores × 90 days × instrumented attach-rate trials. Aim for 25%+ attach at blended \$120 AOV.
7. **First quarterly AFI-level review.** Present the AI showcase results to Wanek-level leadership.
8. **First formal valuation update.** Post-deal revenue run-rate ~\$210–230M; refresh the capital-allocation dashboard.

Twenty-four months (by April 2028)

9. **\$250M revenue milestone** with post-integration 14–15% EBITDA. Strategic optionality work runs in parallel — informal capital-partner conversations carry the relationship side; any process is owner-driven.
10. **Ashley Care Plus fully deployed** at \$2–3M annual revenue run-rate, 50–60% margin.
11. **AI operating layer at scale.** Store-level P&L, margin, inventory, pricing, and clienteling all running through the integrated decision layer with quarterly Ashley performance reports.

B.12 Capital-partner universe (when relevant, on the owner's timeline)

Capital-event optionality is owner-driven and not a near-term action item. The work in this lane is relationship-building over 12–18 months so that any future conversation happens on the owner's timeline with counterparties who already understand the business. The names below have been active in family-owned mid-market and consumer / specialty-retail platforms and are credible based on 2024–2026 deal activity.

- **Pritzker Private Capital** — \$3.4B fund (August 2025 close), mid-market family-owned focus.
- **Bain Capital** — owner of Bob's Discount Furniture; deep category knowledge.
- **Forward Consumer Partners** — ex-L Catterton spinout; \$425M first fund (2024); mid-market consumer.
- **Sun Capital Partners** — Lexington Home Brands history; Florida-HQ'd.
- **BDT & MSD Partners** — family-business advisory plus capital; relationship-first.
- **Pamlico Capital** — NC-HQ'd Southeast mid-market.

B.13 Risks to monitor

- **Manufacturer approval mechanics.** Every M&A move involving an Ashley licensee requires AFI approval; the contractual mechanics aren't public. *Mitigation:* run informal Wanek-level conversations on any material move early — not after LOI.
- **Integration capacity ceiling.** Buyer-side bandwidth is the real governor on deal cadence. *Mitigation:* stage VP Corp Dev plus the redesigned Role Design + Applied AI seat before deal #2 and #3 close; model one new deal per integration-quarter as the ceiling.
- **Seller's market as rates ease.** Lincoln International expects H2 2025 to be when momentum breaks loose; valuations on attractive targets may rise 0.5–1.5× EBITDA. *Mitigation:* run two deals in the next 12 months; do not wait for perfect.
- **FRG-footprint dividend is time-limited.** Landlords will re-lease the vacant boxes across 2026–2027. *Mitigation:* 45-mile-radius opportunity map complete in 60 days; 3–5 boxes committed by end of 2026.
- **Tariff volatility.** Lincoln International flags tariffs as the 2025 wildcard; impacts COGS on anything not domestically sourced. *Mitigation:* scenario-model 10% / 20% / 30% tariff increases on non-US product mix.

WHAT'S IN SCOPE HERE VS. WHAT'S NOT

This section synthesizes the M&A and capital lane at the level appropriate for a working briefing. Sourcing, full named-target dossiers, capital-partner outreach mapping, and modeled cap tables sit in the supporting research files and are available as the engagement progresses.

Role Design and the AI Decision Layer

Role architecture for the seat sketched in Justin's April 20 note — a CFO-shaped role with technology and applied AI in scope, sitting *above* the existing data infrastructure rather than displacing it. The aim: a small set of crisp accountability statements, an applied-AI roadmap that compounds on existing investments, and a finance function that absorbs roll-up complexity without slowing it down.

C.1 Role anchors

SCOPE OF ACCOUNTABILITY

Accounting and controllership (incl. inventory). Deal support and modeling. Entity design and structure. Management and operating framework. Applied-AI roadmap. Technology and IT.

AI DECISION LAYER

Existing data foundation provides implementation. The decision layer that turns data into operating choices and margin actions is the seat the role owns.

MANUFACTURER CONTEXT

Ashley corporate (Theo / FrontlineIQ for floor coaching, AshleyDirect for ordering and assets) is operating at the floor and pipes layer. The 29-store decision layer remains an open seat.

GMROI DIRECTIVE

Ashley's December 2024 Excellence Framework is a positioning document with commercial enforcement (product access, co-op eligibility) — not a contractual numeric target.

C.2 The three operating layers

A useful way to read the AI landscape inside an Ashley licensee operation: floor, pipes, and decisions.

FLOOR LAYER · ALREADY SHIPPING

Sales-rep coaching at the showroom (Theo / FrontlineIQ via Ashley AI Advantage). Lands inside store sessions, free at the licensee level. Useful and underutilized — but bounded.

PIPES LAYER · IN BUILD

Data foundation, ingestion, model and dashboard infrastructure. Largely owned by the existing data vendor. Fast progress recently; agentic capabilities being built on top.

DECISION LAYER · OPEN SEAT

The translation of data into operating choices that move GMROI, gross margin, sell-through, and labor productivity. Connects pipes to specific weekly and quarterly merchandising, pricing, inventory, and operations decisions. This is where the Role Design + Applied AI seat sits.

C.3 Year-1 outline

- **Inventory and GMROI lever map.** 80/20 SKU audit, order frequency / depth tuning (Ashley's MOQ-of-1 enables this), structured promotional clearance design.
- **Pricing and assortment cadence.** Weekly pricing rhythm with explicit decision rights and a single source of margin truth tied back to the data foundation.
- **Last-mile economics.** Independent assessment of the in-house delivery operation against 3PL alternatives at current and post-acquisition footprint scale, focused on capital and complexity not just unit cost.
- **Finance modernization.** Faster close, cleaner inventory accounting, and a forecasting cadence that holds up post-AGR integration.
- **Applied-AI roadmap.** Sequenced capabilities (call-center triage, demand forecasting layer above corporate, agentic decision support for merchants, etc.) with explicit coordination with the existing data vendor.

C.4 Why this role exists now

- **Two-side mandate from Ashley corporate.** Both the AI commitment and the GMROI directive create a multi-year window where modernization and franchisee economics are explicitly on Wanek's stage.
- **Roll-up scale.** A path to ~48 stores in 18 months changes the finance, IT, and decision-cadence requirements faster than incremental hiring can absorb. The role exists to absorb that complexity.
- **Vendor seam.** The pipes layer is well underway; the decision layer is the next build. The role exists to turn pipes into outcomes, not to rebuild pipes.

C.5 What the role specifically owns

LANE	OWNED
Financial controllership	Accounting system migration (likely toward Sage Intacct or NetSuite), month-end close acceleration, multi-entity P&L consolidation post-roll-up.
M&A sourcing and diligence	Owns pipeline and playbook in partnership with VP Corp Dev. Structures deals. Runs diligence. Owns integration outcomes.
Capital allocation	Owns the single-page capital dashboard. Updates quarterly. Tradeoff recommendations across new stores / M&A / tech / dividend.
Applied AI & technology	Owns the data-vendor relationship; evaluates tech investments using a defined ROI framework; owns the decision layer that sits on top of the data foundation.
External partner management	Ashley corporate, final-mile partners, Koalafi / Synchrony, sleep-vertical partners. The face for 1915 South leadership across the external relationships that matter to the operating model.

C.6 What the role explicitly does not own

- Replace the existing VP of People or VP of Sales / Operations.
- Store-level HR policy, labor relations, or compensation committee.
- Marketing execution (a VP Marketing exists).
- Project-managing the data vendor (vendor-side role; managed but not owned by this seat).

SECTION D · INNOVATION WORKSHOP — VISUAL PREVIEW

Ten Concepts · Three Tracks

A snapshot of Track A (Format / Product) hero visuals from the Innovation Workshop. Full pitch — including Track B (Ops / AI Arbitrage) and Track C (Back-Office / CFO Transition) — sits in the companion **Innovation Workshop PDF**, with 39 ideas scored and sequenced.

Tracks at a glance

TRACK A · FORMAT / PRODUCT

Store formats, service products, channel extensions. 10 hero concepts with visualizations.

TRACK B · OPS / AI ARBITRAGE

Operating-cadence ideas where AI, automation, or process redesign creates measurable arbitrage against current run-rate.

TRACK C · BACK-OFFICE / CFO TRANSITION

Finance, controllership, and back-office modernization ideas tied directly to the role architecture in Section C.
